Automation, ESP8266, ESP32, Monitoring, IoT, Healthcare,

Títulos para o artigo:

- Criação de um plataforma para organização de medicamentos e de um disposto que auxilia e guarda os medicamentos.

- Design e implementação de um dispositivo inteligente utilizando um ESP32, para organização e notificação de medicamentos em conjunto com uma plataforma de helathcare para um melhor acompanhamento do paciente(cada compartimento tem para identificar qual o remedio que irá ser tomado naquela hora notificando com um led, com um conjunto de números em braille para pessoas com déficit óptico e notificação pelo celular do paciente e do responsável).

- Prototipação de um vestível que realiza o monitoramento cardíaco para o acompanhamento do paciente.

- Design e implementação de um dispositivo para captar saliva do paciente e verificar se está com tuberculose.

-
